### **Personal Statement**

I am a proactive and dedicated programmer and I have varied experience, having written different features and fixed all kinds of problems with different technologies and languages.

I'm passionate about programming, writing clean code, updating my skills and improving myself professionally. I am looking for an opportunity where to work with a team that feels the same passion for writing good software.

### **Skills**

- Languages: Java, Kotlin, Typescript
- Frameworks: Spring, Spring-boot, React
- AWS: AWS Lambdas, S3, EC2, Fargate
- Database fundamentals, SQL and NoSQL
- Testing: JUnit, Mockito, Assertj, Jest
- Other: Linux, Git, Maven, Gradle, npm, docker

### **Employment Experience**

**May 2022 - November 2023**

**Flutter International (Pokerstars)**

**Java Software Engineer**

- Completed different features using spring-boot and Kotlin
- Developed AWS Lambdas from scratch including infrastructure code
- Collaborated on infrastructure tickets
- SQL performance improvements
- Participated in code reviews for different projects (UI/API)

**April 2021 – May 2022**

**CACI (NTROD)**

**Java Developer**

- Worked on the NTROD project
- Created AWS infrastructure using Terraform
- Refactored the production infrastructure code before going live.
- Added a Nginx proxy and Fargate tasks to redirect traffic between UI and other components
- Fixed bugs in the inherited platform (Java, Spring, Kafka, ActiveMQ)

**August 2020 – April 2021**

**ADI (Painsense)**

**Java Developer**

- Added functionality to the system using a Drools rules engine
- Added push-generic-notifications feature
- Added UUIDs management feature
- Every development completed with Unit Tests
- Every feature completed with Cucumber integration tests

**May 2019 – March 2020**

**Agility Multichannel**

**Java Developer**

- Participated in agile meetings
- Developed new features and enhancements for Agility PIM product
- Wrote Liquibase scripts to change the database SQL schema
- Added Create, Lookup, Modify and Delete operations on different Agility resources
- Created Junit annotations to filter integration tests based on the release version
- Integration tests against the PIM API

**July 2017 - October 2018**

**Accenture (Argentina)**

**Tech Architecture Delivery Associate - Account: DirectTV**

- Completed training on Service Oriented Architecture and Oracle Service Bus, which allowed me to take responsibility for most of the development tasks within the team.
- Fixed reported bugs and refactored messy code on many service components.
- Analysis, design and development of small features and enhancements on the DirectTV SOA BPELs.
- Coordinated deployments with the DevOps Team in different environments (QC/QA/PROD)

## **EDUCATION**

**National University of North-western Buenos Aires (UNNOBA)**

- Degree in Systems Analysis (Bachelor of Science equivalent) (2017)
- Spring.io (Conference)

## **LANGUAGE SKILLS**

- Spanish: Native speaker
- English: Advanced level

## **ADDITIONAL INFORMATION**

- Italian passport, UK pre-settled status
- UK Driving licence
