Personal Statement

True passions become professions. I am a passionate programmer always designing and architecting solutions that optimize the code and increase its performance keeping it clean.

Skills

- Languages: Java, Kotlin, Typescript
- Frameworks: Spring, Spring-boot, React(beginner)
- AWS: AWS Lambdas, S3, EC2, Fargate
- Database fundamentals, SQL and NoSQL
- Testing: JUnit, Mockito, Assertj
- Other: Linux, Git, Maven, Gradle, npm, docker

Employment Experience

May 2022 - November 2023

Flutter International (Pokerstars)

Java Software Engineer

- Completed different features for the CMS API (REST Spring API)
- Developed AWS Lambdas from scratch including infrastructure code
- Collaborated on infrastructure tickets
- SQL performance improvements
- Participated in code reviews for different projects (UI/API)

April 2021 – May 2022

CACI (NTROD)

Java Developer

- Worked on their NTROD project
- Creation of the AWS environments using Terraform
- Refactored the production infrastructure code before going live.
- Creation of a Nginx container and Fargate tasks to redirect traffic between UI and other components
- Fixed bugs in the inherited platform (Java, Spring, Kafka, ActiveMQ)

August 2020 – April 2021

ADI (Painsense)

Java Developer

- Added functionality to the system using a Drools rules engine
- Added push-generic-notifications feature
- Improved UUIDs management
- Every development made using TDD
- Every feature completed with Cucumber integration tests

May 2019 – March 2020

Agility Multichannel

Java Developer

- Participated in agile meetings
- Developed new features and enhancements for Agility PIM product
- Wrote Liquibase scripts to change the database SQL schema
- Added Create, Lookup, Modify and Delete operations on different Agility resources
- Created Junit annotations to filter integration tests based on the release version
- Integration tests against the PIM API

July 2017 - October 2018

Accenture (Argentina)

Tech Architecture Delivery Associate - Account: DirectTV

- Received training on Service Oriented Architecture and Oracle Service Bus, which allowed me to take responsibility for most of the development tasks within the team.
- Fixed reported bugs and refactored messy code on many service components.
- Analysis, design and development of small features and enhancements on the DirectTV SOA BPELs.
- Coordinated deployments with the DevOps Team in different environments (QC/QA/PROD)

EDUCATION

National University of North-western Buenos Aires (UNNOBA)

- Degree in Systems Analysis (Bachelor of Science equivalent) (2017)
- Spring.io (Conference)

LANGUAGE SKILLS

- Spanish: Native speaker
- English: Advanced level

ADDITIONAL INFORMATION

- Italian passport, UK pre-settled status
- UK Driving licence
